## WHAT IS BIG PHARMA?

Big Pharma uses fear like drug cartels.

## BULLYING TACTICS USED BY BIG PHARMA

- 1) The non-expert problem.
  - They are the doctors & we are not. We need to just trust them and their medical jargon like Hyperbilirubinemia for extreme jaundice.
- 2) Anachronism.
  - “If you don’t do exactly what we say, it is going to be just like the Spanish flu.”
  - In 1925, [only half of American houses had electrical power](#). By the 1930’s indoor plumbing and running water became readily available.
  - This wouldn’t happen in modern America.
- 3) Emotional blackmail.
  - “If you don’t do this your child is going to die.” “This is good for your child, why would you deprive them of this?”
  - Suggesting every decision is life or death.
- 4) Manipulations of data and definitions.
